## Editorial.....N Consciousness

The result of the 1st term exam was published on the 15th of shrawan. The gathering of guardians seemed remarkable this time as the school administration had exerted a little bit more pressure to the guardians to come to school to see their kids' result. It is really a matter of inspiration and enthusiasm for the school team. Because it is necessary to raise the interest of guardians about the condition of their children academically. Actually a student's quality of educational status depends on the triangular structure of school authority, guardians and the students. If these three factors work well from their sides, no doubt, all round development (holistic development) of children happens to be possible. We are happy in a sense that our guardians are now aware about the study of their children and hope they will be more interested in their kids progress in the days to come.

Thanks.

## Massege from the vice principal

It's my pleasure to express a few words regarding the school's progress and prospects in Bijaya Buds, the school manifesto. This school is proceeding ahead in a massive way tearing every obstacle and trouble that comes in it's confrontation. There's no doubt, it has been possible due to love and intimacy of our dearest guardians and well-wishers.

The school has been running the classes of +2 in management since 2067. There is no compromise in quality and infrastructure in this school and accordingly the management committee is dedicated to improve the all round promotion of the school including constructions and selection of competent teachers staff. The school administration also delivers its' duty smoothly. Parents of the weak students are being called for interaction to boost the children up in their studies; simultaneously tuition and coaching classes are running in the school to strengthen the level of the students. In spite of these attempts and performance, there might be some error and weaknesses within us and we'll always be seeking for feedback and suggestion from our valued guardians and well-wishers.

Thanks.

B.P. Neupane
